Notification of Specification Changes: WAT-910HX MBD Series

First and foremost, thank you very much for your continued business. We are committed to continue to deliver quality products to you.

This letter is to notify you of the specification changes to our cameras mentioned above. We will be switching to new components on the Printed Circuit Board (PCB) in order to supply the model which **power supply range of “DC+5 - 12V”** is added.

The applying for the new power supply range affects **the power consumption from “0.96W (80mA)” to “0.75W/150mA (DC+5V), 0.78W/65mA (DC+12V)”** and this will be reflected in the specification sheet.

The performance of the camera remain unaffected by the changes and expect that there would be minimal to no impact to you.

The implementation schedule is from **October 2018**. Please note that delays may occur depending on inventory status.

About the updated specification sheet, downloads are available through the WEB.

We kindly request your understanding, and please contact us anytime if you have any further questions.

Sincerely,

Watec Co., Ltd.
